Report on Google Student Ambassadors Workshop on “NANO BANANA”

The Department of Computer Science and Engineering, **Bhoj Reddy Engineering College for Women (BRECW)**, organized a series of interactive workshops on “**Nano Banana**”, conducted by the **Google Student Ambassadors**, for the **II and III B Tech CSE students** during July 2026.

The sessions were conducted with the objective of introducing students to **Nano Banana**, a **Generative AI-powered image creation and editing tool**, and demonstrating its applications in creativity, design, content generation, and productivity. The workshops provided students with practical exposure to AI-powered image generation and editing using text prompts.

The banner is a promotional graphic for a Google Student Ambassador Workshop. It features the Bhoj Reddy Engineering College for Women logo and accreditation details at the top. The central text reads 'Department of Computer Science and Engineering is organizing Google Student Ambassador Workshop For II & III B.Tech CSE A&B Students'. Below this, it specifies the date as '22, 24, 27, 29 July 2026' and the venue as 'Respected Classrooms'. The banner is decorated with a cartoon robot, the Google logo, and a group of people icon.

III B Tech CSE-B	29 July 2026	11:30 AM – 12:30 PM

Highlights of the Workshop

The sessions included an introduction to Generative AI and the capabilities of **Nano Banana**. Students were given demonstrations and practical guidance on:

- Generating AI-powered images using text prompts.
- Editing and modifying images through natural-language instructions.
- Understanding effective **prompt engineering techniques**.
- Exploring creative applications of Generative AI.
- Using AI tools for academic activities, projects, presentations, and content creation.
- Understanding the importance of responsible and ethical use of AI.

The interactive nature of the sessions encouraged students to actively participate, experiment with different prompts, and explore the creative possibilities of Generative AI. The students showed considerable interest in understanding how AI-powered tools can be used to enhance creativity, productivity, and digital skills.

Outcome

The workshop successfully provided students with practical exposure to the latest Generative AI tools and their real-world applications. Students gained a better understanding of **AI-powered image generation, image editing, prompt engineering, and responsible AI usage**. The sessions also encouraged students to explore innovative ways of using Generative AI in their academic projects and creative activities.

The **Google Student Ambassadors** effectively facilitated the sessions through demonstrations and interactive activities. The workshop was well received by the students

E-certificates were provided to the participants upon successful completion of the workshop.
