### **Department of Information Technology** **COWE Project Report submitted by students**

We got to know about this fempreneur season-3 through some of the available sources, and we thought it would be helpful for us. It was all about the business idea. So, with the guidance and support of my staff we took part in this competition. We came up with an idea called "Pothole detection system in vehicles". The first round was to submit the abstract on our business idea. There were many teams and of them, best 14 were to be selected.

After 2-3 days we got to know that our abstract got selected for next round. And then we got to know that we need to prepare a power point presentation for i.e. took a step ahead, asked our teachers about the sensors how they work, we got all the matter and we presented the ppt which was conducted in online mode. We answered all the questions asked by the judges. And we were waiting for the final round for which only 5 teams are to be selected.

Next round is conducted in offline mode and the venue is The Plaza Hotel which is in Begumpet. We got the result on 9<sup>th</sup> that we are qualified for the final round. We all were happy. And on that day itself, they have conducted a mentoring session for what all topics to be covered in presentation. We noted all the points and made sure that our presentation was good.

On that day, we reached out there and the chief guests came. More over as it is a women conducting show, we all were excited. Finally we gave our presentation and we all were waiting for the results. They started announcing from the bottom most position. We got third prize. We thank our college management for constantly supporting us.
